

Sterile Compounding Services: Where Quality Meets Experience.

It is the compounding process, attention to detail, and the quality of the components that makes our compounded formulations exceptional. Nowhere else is this exemplified more than in our Sterile Compounding Services. College Pharmacy has a state-of-the-art clean room and ISO 8 compounding lab where all sterile formulations are compounded by specially trained pharmacists and compounding technicians using advanced techniques and equipment. College Pharmacy's compounding practices are both USP 795 and 797 compliant, and our testing protocol includes Potency, Sterility, Endotoxin, and Fungal testing.

For over 40 years our pharmacists have worked collaboratively with professional organizations and healthcare practitioners to develop and compound high quality compounded formulations. The range of services that we offer our customers is surpassed only by our years of compounding experience.

Knowledge Changes Everything: Quality. Innovation. Experience. Since 1974.

Expanded IV Protocol Selection

College Pharmacy is proud to offer healthcare practitioners a comprehensive selection of IV protocols that are compounded following strict quality standards.

- Methylcobalamin (Pres or PF)
- PTC 5% IV w/Deoxycholic Acid
- Procaine HCL Buffered
- Silymarin PF IV (Milk Thistle Extract)

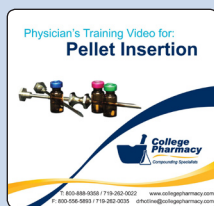

Practitioner Resources

College Pharmacy is proud to offer a variety of professional services and resources to help simplify the process of introducing compounded medications into the clinical practice, increasing practice profits, and patient satisfaction.

The A-Z BHRT Practitioner's Guide & Beyond Basic BHRT Training Package:

We have combined two popular resources to create an in-depth guide that includes information about compounded BHRT formulations, laboratory reference ranges, and BHRT research abstracts to help incorporate BHRT into your practice. Available in an easy-to-use CD with .pdf's, or an instant "Click & Access" email format. Request your complimentary copy via our website, www.collegepharmacy.com, under "Healthcare Practitioners".

Physician's Training Video For Pellet Insertion (DVD): When patients call us for practitioner referrals, they most often request a BHRT Pellet practitioner. This three part series includes testimonials from pellet patients, an in-depth interview with experienced pellet practitioner Dr. Jack Ford, along with live footage of the pellet implant procedure. Contact us directly to order your DVD today. (Price: \$125.00)

Additional Practitioner Resources

ePrescribing Options: College Pharmacy has expanded our services to include electronic prescribing through Life-File and Surescripts. Are you interested in setting up a Life-File account or transmitting prescriptions through Surescripts? Contact us directly or visit our website for additional information.

Website Resources: Have you visited www.collegepharmacy.com? Our website includes many useful articles, downloadable order forms, in-office patient resources, and important information about our services.

Online Nutritional Supplement Center: Our online nutritional supplement center offers many hard-to-find pharmaceutical-grade professional supplement lines that are not readily available in many communities.

Protocols & Research Articles: Are you looking for specific information on a protocol? Or, maybe research on a particular compounded formulation? We will be happy to provide you with additional information to help you introduce custom compounding into your practice.

Patient Resources: From placebo samples of our sublingual tablets to health and wellness related articles, College Pharmacy has a wide-variety of materials to help educate patients about compounding, our services, and our company.

Patient / Practitioner Referral Program: All College Pharmacy practitioners are automatically enrolled in our patient referral program.
